SUMMER/AUTUMN 2023

'Double Rainbow Over Flying Pond' —by Heather Marshall

'Kapil and I were sitting in the cabin waiting for the rain to stop with two of our very best friends visiting Flying Pond for their first time. We noticed the sun peeking through the clouds illuminating the pond even though we were still in the dark. Then a burst of color appeared across the sky, not once but twice.

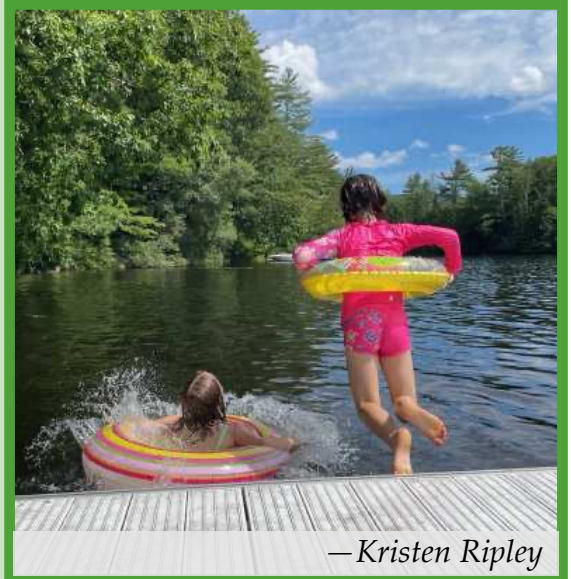

The lower rainbow was the brightest any of us had ever seen!'
